

## Says

What have we heard them say?  
What can we imagine them saying?

## Thinks

What are their wants, needs, hopes, and dreams?  
What other thoughts might influence their behavior?

My project is including communication i revolution in indis

I was expecting more about the project

How i create the idea

What are the dates suitable for my project

They simply need to show there is a market demand and then have improved sales on the second generation

I was comple the project with something different

My team project is a best project

Who create the idea

I complete the project very good mannger

You they think was the of time [or] was the of project corlstupit work

I will need to get a docking station

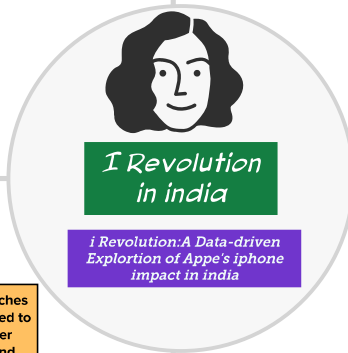

I think it not a best project

I complethe project number of idea

I did the project very clurity

How my project was best

Then once it was complete I then let it install it onto my device

The Apple Watch, in spite of selling more units than the iPhone did in their first year, is often called a flop

There are two ways to look at the iPhone's success

In that it accomplished Apple's goals and set the stage for the iPhone of the future, it was wildly successful

The first iPhone was too expensive and too exclusive to be mainstream

Apple launches are compared to their other mature and wildly successful products

The first iPhone laid the groundwork and set the stage for the first wildly successful iPhone in the consumer market: the iPhone 3G.

it was successful beyond the wildest dreams of anyone in the industry

Apple success is measured so differently than other companies

The iPhone was compared to the iPod, not at launch, but the current market

However first generation products don't need to be successful in and of themselves

The iPhone did that. So in all ways that matter, the iPhone was a success

Our country will grow beyond imagination

A series of discrete changes in economic development is also a phenomenon

I feel this project is very useful

i revolution in india based on quality

I feel this project will improve the productivity of our country

Good job in future i revolution in india

iphones offer more security and privacy

The iphones even stops apps from tracking your activity online because of a limited os and platform

Since the iPhone's launch it has gained bigger screen, app ecosystem, better camera, better battery, and many more features

I messages and face time video calls are also end to end encrypted

The iPhone was compared to the iPod, not at launch, but the current market

They simply need to show there is a market demand and then have improved sales on the second generation

Theb iphones is a smart phones made byapple that combines a computer ipod,digital camera and

## Does

What behavior have we observed?  
What can we imagine them doing?

## Feels

What are their fears, frustrations, and anxieties?  
What other feelings might influence their behavior?
